EDUCATION

University of Louisville | Louisville, KY

Graduate: Fall 2026, 2.9 GPA

B.A. in Computer Science, Track in Data Science

- **Interesting Courses:** Graph Database & Analytics, Artificial Intelligence, Python and Data Analytics, Intro. to Database, Data Visualization, Intro. Cloud Computing, Operating Systems, Internet of Things

TECHNICAL SKILLS

Languages (ordered by proficiency): R, Python, C/C++, SQL, Lua

Tools and Frameworks: AWS, GCP, Flask, Streamlit, SQLAlchemy, Git, GoogleEarth Engine, Neo4j, MySQL, VSCode, Antigravity, PlatformIO (ESP8266, etc.)

RELEVANT EXPERIENCE

Christina Lee Brown Envirome Institute | Louisville, KY

Jan. 15th 2025 - Present

Undergraduate Student Assistant - Data Scientist - 25hr/wk

- Planning and coordinating analysis' plans while taking on old research to deliver finalized reports.
- Utilizing national, public health datasets to perform geospatial climate-health two-point time series analysis while fine tuning regression models and updating figures to my PI's request. This was to analyze the association with climate and Cardiovascular Disease across climate divisions.
- Filtering and thinning aerial LIDAR point clouds and transforming them into tree canopy shapes to then identify their genus utilizing satellite images from multiple timepoints.
- Verifying the loadings of principal components to represent cumulative burdens across census tracts to study the guidelines affecting public funding dispersion (Justice 40 Initiative).

Aqlan Lab | Industrial Engineering Department, Univ. of Louisville

May-August 22',23',24'

Undergraduate Intern - Team Lead - 40hr/wk

- Mentored and led a team of interns across three summers to learn and study food inaccessibility across Louisville neighborhoods; developing project charters and deadlines.
- Utilized Python to webscrape public grocer data and ArcGIS to perform statistical analysis on spatial trends of multiple census tracts within Louisville.

PROJECTS

PlanPocket | Course Project

Summer 2025

- Collaborated in an AGILE environment to develop a financial tracking application for personal use.
- Used flask framework and HTML/CSS to set up the application environment.
- Presented reports for each sprint, outlining feature implementations and project status.

SAF Analytics | Course Project

Fall 2025

- Developed a peer-to-peer lending risk classification application on the LendingClub dataset using Streamlit.
- Optimized and trained an xgBoost model which receives user inputs to give insights to investors.

PROJECTS

Game Development Club | University of Louisville
